

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION 6

1445 ROSS AVENUE, SUITE 1200

DALLAS TEXAS 75202-2733

**MEMORANDUM**

**SUBJECT:** Analytical Results for EPA Drum Samples

**TO:** Cindy Mendez  
City of Grand Prairie

**FROM:** Bret Kendrick  
EPA Region 6

---

EPA Region 6 collected ground water samples from monitoring wells associated with the Delfasco Forge site on November 19 – 20, 2008. As part of the sample collection procedure, each monitoring well was purged prior to collection of the sample. All purge water was placed into two steel 55-gallon drums and temporarily stored at the City of Grand Prairie's drum storage pad. At the conclusion of the sampling activities, one sample of accumulated purge water was collected from each drum and analyzed for total volatile organic compounds.

Attached to this memo are:

- A summary table of the analytical results for samples collected from the Delfasco Forge monitoring wells and the drums of purge water;
- The analytical results printed from the laboratory analytical data package for each of the drum samples collected; and
- A compact disk containing an electronic copy of the full laboratory analytical data package for the ground water samples collected at the Delfasco Forge site.
